

## Explanatory Notes on Main Statistical Indicators

**Statistical Unit in Construction** refers to corporate enterprise engaged in the construction of buildings and structures and in the installation of equipment. A corporate construction enterprise should have qualification certificates with independent accounting system, and should meet the following 3 requirements: a) being set up in line with relevant legal basis, having its full name, organization and location, and capable of taking civil liabilities; b) independently possessing and using its assets and assuming its liabilities, and entitled to sign contracts with other institutions; and c) making independent accounts of its profits and losses, and capable of compiling its own balance sheet.

**Gross Output Value of Construction** refers to total of construction products and services, expressed in money terms, produced or rendered by construction and installation enterprises during a given period of time. It includes:

(1) Output value of construction projects, that is the value of projects covered by the project budgets;

(2) Output value of installation projects, that is the value of the installation of equipment, (excluding the value of the equipment to be installed);

(3) Output value of others, that is the output value of construction industry excluding that of construction projects and installation projects. It includes: output value of repair of buildings and structures; output value of non standard equipment manufacturing; overhead expenses received by contracted

enterprises to the sub contracted enterprises and the completed output value of construction activities that have no clear definition.

a. Output value of repair of buildings and structures, that is the value created through the repairs of buildings or structures, but does not include the value of buildings or structures being repaired and the value of the repair of production equipment;

b. Output value of manufactured non standard equipment, that is the value of non standard production equipment including raw materials and manufacturing cost made for the construction project (i.e., chemical plant; kettles or tanks used by refineries; various fillers, triangle tanks, valves used by mines), and the output value of equipment manufactured by subsidiary workshops.

**Floor Space of Buildings under Construction** refers to floor space of buildings under construction during the reference period, including newly started buildings, buildings started earlier and continued during the reference period, and buildings suspended earlier but restarted during the reference period, buildings completed during the reference period, and buildings under construction and then suspended during the reference period.

**Floor Space of Buildings Completed** refers to the floor space of buildings that are completed in the reference period in accordance with the requirements of the design, up to the standard for putting them into use, and have been checked and accepted by concerned departments as qualified ones.
